OBO
BETTERMANN

OBO. Used by professionals

OBO knows what professionals need: perfect solutions for every sort of electrical installation. User-friendly, practical products for fast and straightforward assembly. Furthermore a comprehensive training programme and the qualified OBO hotline for on-site advice and help during problem solving. OBO – the brand with direct connection to the customer.

Systems

Conducting electricity, routing data, controlling energy – with a comprehensive range of more than 30,000 items OBO offers user-friendly products and practical solutions for a professional data communication and electrical infrastructure in electrical installation. And for everybody who already works with OBO quality products, it is self-evident that one component is compatible with the next. Diversity on one hand and interlinked thinking on the other is for us as system manufacturer a matter of course.

- ▶ A comprehensive range for all types of electrical installation.
- ▶ More than 30,000 items in seven product groups.
- ▶ Continuous product maintenance and development.
- ▶ In-house development and in-house manufacture.

Quality

Professionals need quality. The OBO brand with all its products and services lives up to this motto.

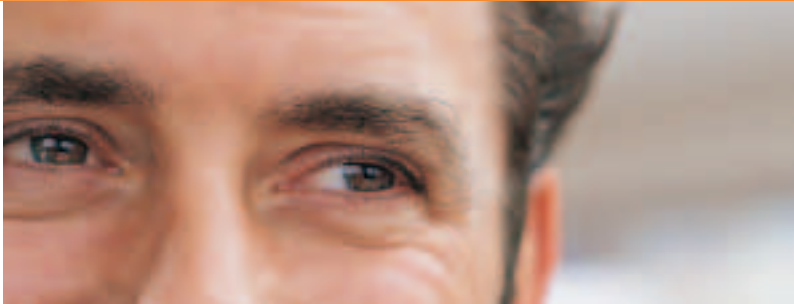

- ▶ QS certification according to DIN EN ISO 9001:2000.
- ▶ Numerous national and international test marks and certificates: GS and VDE marks, UL registrations.
- ▶ Active participation in national and international standardisation bodies.
- ▶ Perfect logistics solutions for packaging and shipping.

Attractive product series for any imaginable use and application areas – these are the modern flush mount systems by OBO, which we present to you in this brochure. Convincing functionality and up to date styling are perfectly combined here. The system ranges from the functional Standard version via the elegant and variant rich Dialog series and the particularly flexible Modul 45 system to the luxurious Aura series, which can be delivered in three design versions. The choice is yours!

Your OBO EGS team.

Proximity

Advice and help

OBO BETTERMANN is present in more than 50 countries with subsidiaries, regional branches and agencies. All centres make sure that OBO is even faster, more accessible and better for the customers.

Here you will find what you are looking for

Modul 45

Modul 45 is the ideal solution for all installations for which maximum flexibility is required. Switches, sockets and data technology only have to be clicked into the installation ducts (Rapid 45, EEK, GES, GEA), and are also extremely flexible for subsequent modifications.

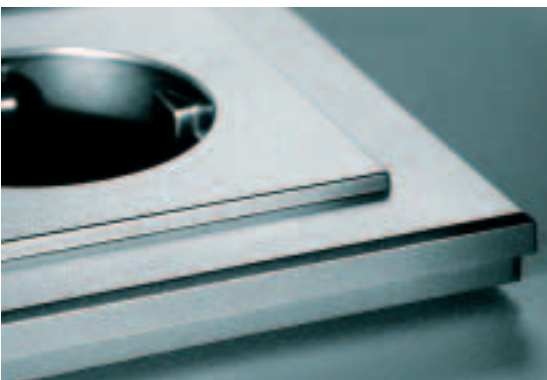

Standard

The Standard range has a persuasively attractive design, combined with refreshing white tones. The Inline variant creates an elegant appearance of the switches.

Dialog-Exklusiv

What is special about this switch series is the high-quality finish with gold or chrome-coloured Exklusiv frames. The combination frame with metallic inlay gives this series its distinctively exclusive touch.

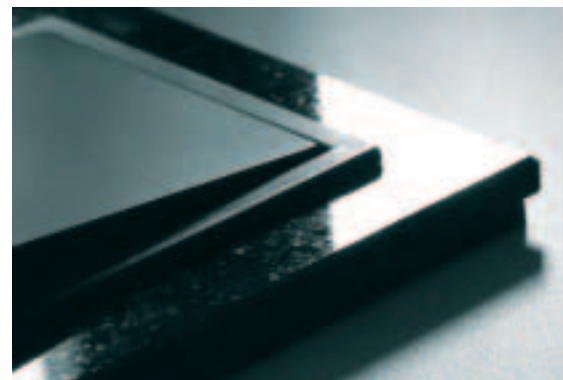

Aura-Basis

The plastic variant of the successful Aura collection is convincing through its emphatically straight-line design – the economical way of including attractive and contemporary accents.

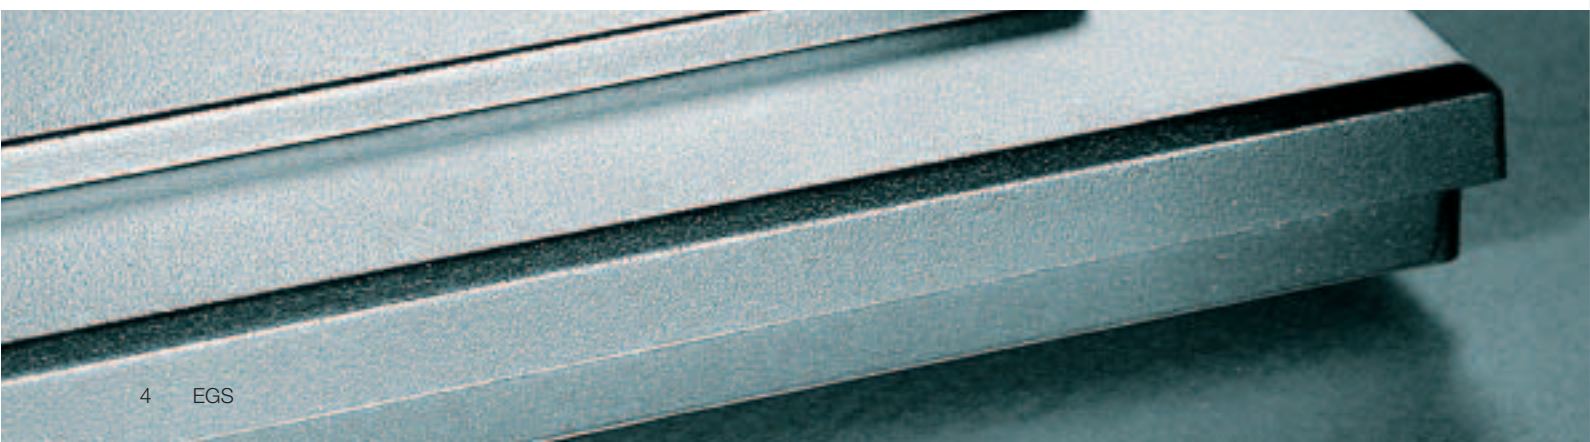

Aura-Glas

The combination of proven switch technology with refined, varied glass frames gives this Aura line its particular attractiveness. It is clear that such switches are not seen every day!

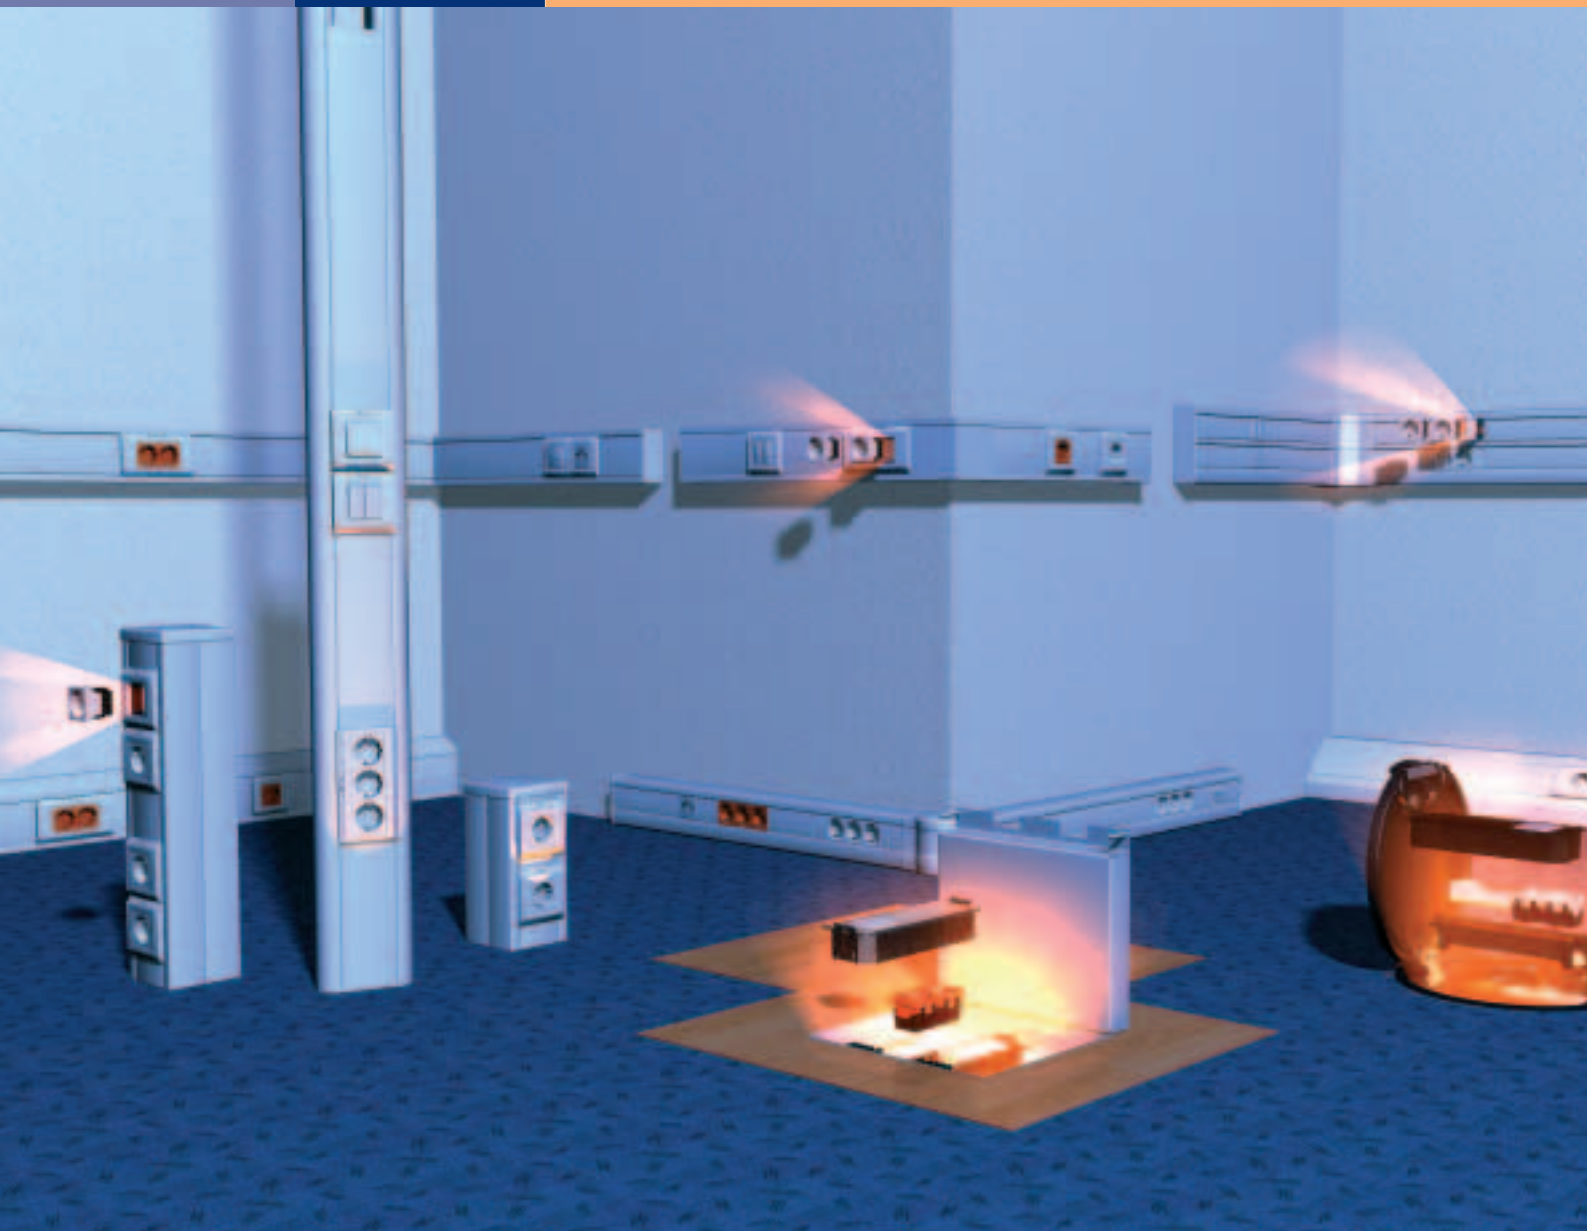

Aura-Stein

Solid marble and stone types give the frames in AURA Stein a high degree of representative elegance – in fact a range that makes a high-quality impression.

The benefits at a glance

Modul 45	A concept with a future	Page 6
Standard	Attractive design that fits everywhere	Page 7
Dialog-Exklusiv	Switches with particular flair	Page 8
Aura-Basis	Elegant and efficient at the same time	Page 9
Aura-Glas	For all who demand greater clarity	Page 10
Aura-Stein	A strong series of solid stone	Page 11

A concept with a future

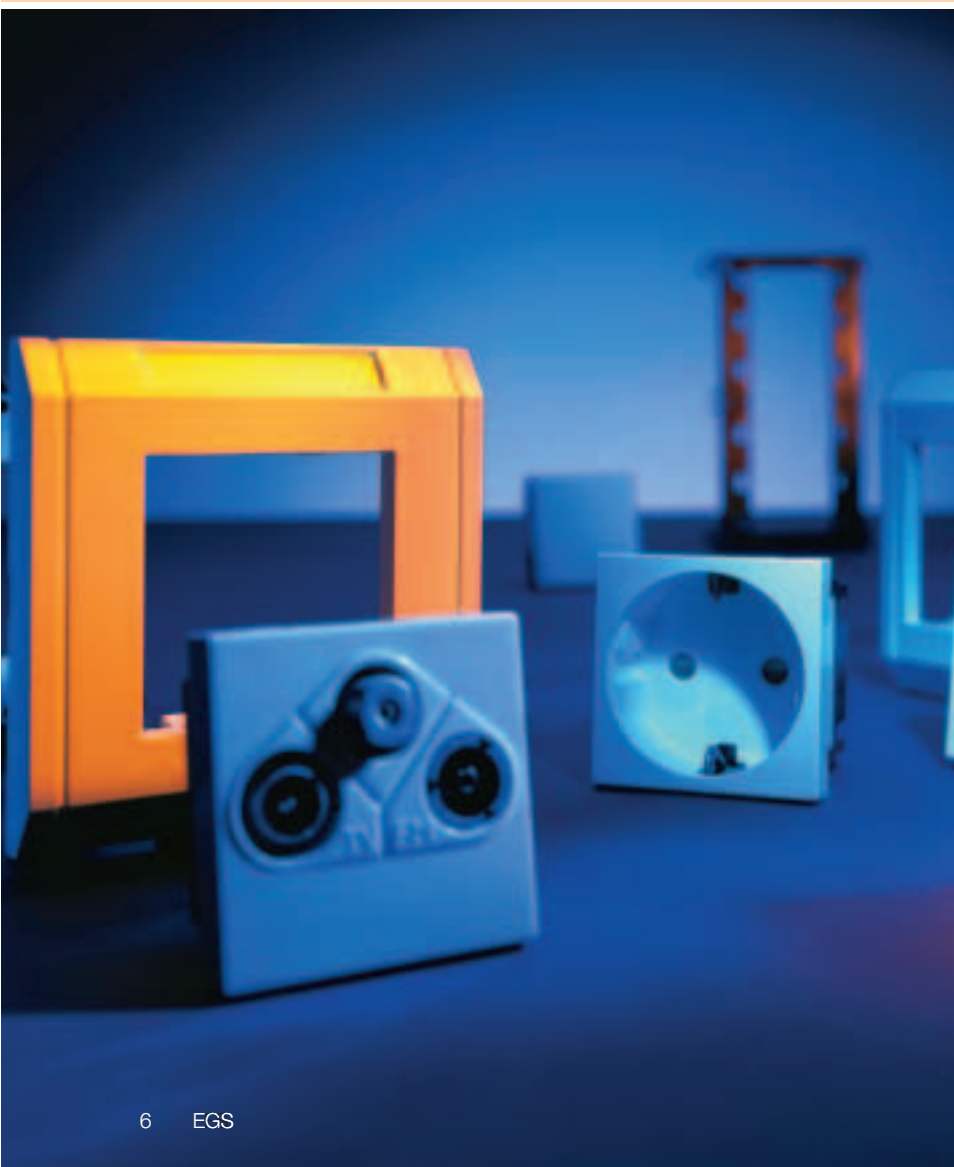

MODUL 45

Concept with a future: the Modul 45 series flush mount systems from OBO.

The new flush mount series Modul 45 is the ideal solution for all installations which require complete flexibility: switches, sockets and data technology need only be

snapped in – and they remain flexible for subsequent changes. The flush mount devices are installed with the simplest movements and without additional tools – the result is in every case a perfect, beautiful and practicable solution. The sockets are available in the colours white,

red, green, orange and aluminium as well as in single, double and triple variants. Whatever, wherever and however you would like to install: with OBO you achieve fast and problem-free results.

Attractive design that fits everywhere

STANDARD

Standard belongs to the most demanded and versatile OBO systems. No surprise: here linear shapes and

fresh white tones combine to create an extremely individual alternative to the ordinary. In addition the Inline

variant accentuates the balanced look – in any interior.

Switches with particular flair

Dialog-Exklusiv

Sometimes it is exactly the details that turn a product into something very exquisite. Dialog-Exklusiv provides the best example of this:

elegant decor frames in gold or chrome colour give the switches a particularly representative flair. If a high-quality flair is important, then

Dialog-Exklusiv is the right choice. The Dialog series is also available with Standard frames.

Elegant and efficient at the same time

Aura-Basis

Irresistible – with its accentuated linear shape. Attractive – with two selected colours. Durable – with

plastic surfaces. Aura-Basis really has an exceptional appearance. Its diversity in looks and functions

makes Aura-Basis a series for every day. Everywhere.

For all who demand greater clarity

Aura-Glas

Aura: Which glass-frame switch offers you such a huge choice of

surface structures and colours? This top class, function-rich series, shows

OBO's vast experience in design of elegant switch series to its full extent.

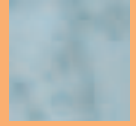

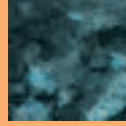

A strong series from solid stone

Aura-Stein

Discover how attractively one of the most traditional materials can work in a strong switch series. Five

fine, solid kinds of stone and marble form the frame for these switches – every piece is unique,

and artfully combined with perfect switch technology. Something very special for that very special room.
