

MultiBase bases for optimised installation

Turn through 180°, combine and install
fast and convenient for surge protection

TBS Transient voltage and lightning protection systems

Fast and convenient installation

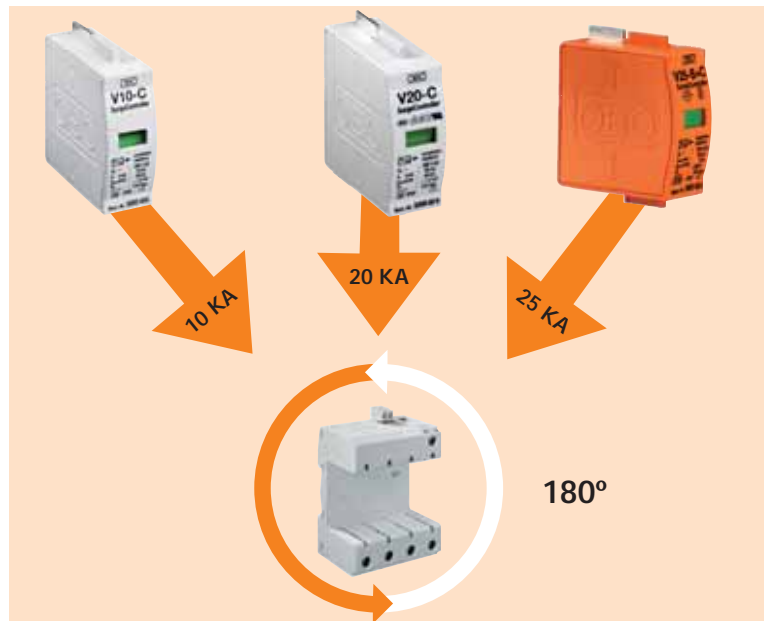

MultiBase: versatile installation and space-saving

Versatile installation options and immense space saving: MultiBase bases offer a host of benefits. The upper parts of the established V25, V20 and V10 series rotate around 180° and can therefore be installed anywhere.

The integrated remote signalling feature reliably shows the status of the protection module without additional space being required.

This makes the MultiBase base adaptable to suit any distributor cabinet.

The intelligent phase arrangement enables multifunction terminals to connect conductors and comb rails for fast and convenient attachment to the series plug-in devices (e. g. FI safety switch).

MultiBase Model	Design	Art. no.
MB 3	3-pole	5096 66 5
MB 4	4-pole	5096 68 0
MB 3+FS	3-pole with FS	5096 68 2
MB 4+FS	4-pole with FS	5096 68 2
MB 2+NPE	2-pole with NPE	5096 65 5
MB 3+NPE	3-pole with NPE	5096 66 9
MB 2+NPE FS	2-pole +NPE+FS	5096 65 7
MB 3+NPE FS	3-pole +NPE+FS	5096 67 1
