

Surge protection for TV receiver units

Ensuring safe reception

Protection of TV systems and
individual devices

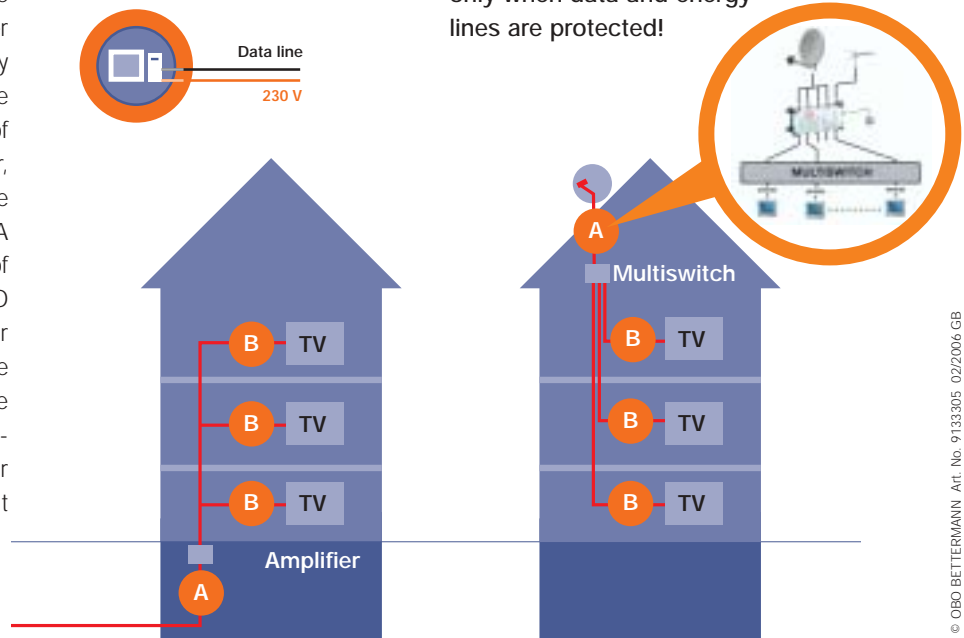

Receiving safe protection quickly and easily

Safely protecting satellite and antenna systems from surges

Satellite dishes and antenna systems can be found on nearly all houses these days. Older antenna systems in particular are currently experiencing a new renaissance due to the introduction of digital television in the form of Digital Video Broadcast (DVB-T). However, this newfound television viewing pleasure may quickly sour if the new receiver or D/A converter is destroyed by the intrusion of magnetic fields and the resulting surge. OBO Bettermann also offers protection devices for this forward-thinking technology which are easy to install and can be used in a multitude of ways. The new, easy-to-install HF protection device TV 4+1 reliably protects your satellite and/or DVB-T system from transient overvoltages.

Diagram of cable TV system

Remember!

Surge protection is provided only when data and energy lines are protected!

Situation

Please select the application

Broadband
(Cable TV)

SAT receiver unit
▶ with multiswitch
▶ and multiway LNB
(e.g. in multiple family house)

Installation location A

▶ Installation between BC transition point and booster

DS-F plug/connector
Art. no. 5093 27 5

DS-F connector/connector
Art. no. 5093 27 2

DS-F plug/connector
Art. no. 5093 27 5

DS-F connector/connector
Art. no. 5093 27 2

TV 4+1
Compact protection device
(4x SAT, 1x terrestrial)
Art. no. 5083 40 0

Installation location B

▶ Installation before each terminal device (TV/video)

FineController FC-TV-D
Fine protection device with an integrated surge protection module for the TV supply cable for the protection of TV units and/or video recorders, incl. adapter cable.
Art. no. 5092 80 8

FineController FC-SAT-D
Fine protection device with an integrated surge protection module for the SAT supply cable for the protection of SAT receivers, incl. adapter cable.
Art. no. 5092 81 6
