Cover lifter for chequer plate cover

Item number: 6049285

Using the cover lifter, chequer plate covers installed with cover clamps can be dismantled quickly and simply.

Position the cover lifters as pairs on the cover clamps and remove the chequer plate cover evenly. Repeat lengthways until the entire cover is removed. Alternatively, the cover lifter can be used as a template for the connector perforation with cable trays cut during construction. For this, turn the cover lifter through 180° and position on the cable tray. Then use the perforation template appropriate to the side height.
